Parks & Recreation Master Plan RFP

During the period for submitting questions regarding the project, only two questions were received.

- What is your allocated budget for this project? We are currently developing our budget for the upcoming fiscal year (May 1) the Board has not given me direction on a not to exceed amount for this study.
- For the athletics field and facilities study portion, we have staff in-house that can look at the operations, programming, and functionality of your facilities, and we will be including a local landscape architecture firm to assess exterior facilities. Typically we don't include indoor facilities architects on master plans, but I'm wondering if we should add one for this element? Will you need detailed capital and/or structural assessments for the indoor facilities? Not sure you would need the indoor facilities architects, what we want to assess is if we would be in need of an additional facility in the future. We will not need any detailed capital or structural assessments; we have good records on that; however, we would like what we have included in the final report.
