ADA Assessment by the Techno tigers

We are the Techno Tigers FLL team #20226.We are a group of eight kids from grades 5-8. We go to four different schools and we have been working together for two years. We have been working together this year to find a problem and solution under the topic City Shaper. We decided to review over 40 parks and add information about them to several websites. We hope to continue more projects like this in the future.
